PROFESSIONAL SUMMARY

Results-driven Backend Engineer with over 3.5 years of experience in Java, Spring Boot, and cloud-native development. Specializes in designing and developing scalable microservices, optimizing database queries, and implementing robust RESTful APIs to enhance system performance. Proficient in automating CI/CD pipelines, integrating authentication mechanisms, and leveraging AWS and GCP for optimal cloud solutions. Strong background in distributed systems, caching strategies, and securing data transactions, along with a solid understanding of Agile methodologies and test-driven development (TDD) to deliver high-performance backend solutions.

CORE COMPETENCIES

- Languages: Java, Python, Javascript
- Frameworks & Libraries: SpringBoot, Node.js, Angular, Flask, Express, Flutter
- Cloud Platforms: Amazon Web Services (AWS), Google Cloud Platform (GCP)
- DevOps & CI/CD: Kubernetes, Docker, Jenkins, Jira
- Databases: SQL, MongoDB
- Other: Microservices Architecture, RESTful APIs, Encryption (HashiCorp Vault), Selenium, Cucumber, Object-Oriented Programming (OOP), Agile Methodologies

WORK HISTORY

Software Engineer-3, 02/2022 - 10/2025

Thales Digital Identity and Security – Noida

- Optimized software performance by identifying bottlenecks, resulting in a 25% reduction in computation time.
- Developed microservices using Spring Boot, integrated with HashiCorp Vault for secure encryption/decryption of data.
- Created AWS Lambda functions in Java for secure file transfer (SFTP) and SMTP-based email delivery.
- Reduced processing time of core algorithms by 25% through optimization techniques.

- Implemented automated CI/CD pipelines with Bamboo, Docker, and Kubernetes, improving deployment efficiency.
- Led software development projects, ensuring alignment with business objectives and technical specifications.
- Mentored junior engineers, fostering skill development and knowledge sharing within the team.
- Automated API and UI testing using Selenium and Cucumber, boosting testing efficiency by 20%.

Full Stack Developer Intern, 05/2020 - 02/2022

Amity Innovation Incubator – Noida

- Developed the backend for the Document Signer application using Flask, deployed on Heroku.
- Optimized existing codebase for improved performance and maintainability across multiple projects.
- Leveraged AWS S3 and RDS for backend operations and dynamic document storage.
- Designed Python scripts to enhance document generation speeds by 30%.
- Worked in an Agile environment with GitLab for project collaboration and version control.
- Improved user interface by developing responsive front-end applications using Angular and Bootstrap.
- Collaborated with UX/UI designers to enhance user experience through iterative feedback.
- Developed responsive web applications using HTML, CSS, and JavaScript frameworks.

EDUCATION

B.Tech: Computer Science, 08/2022

Amity University - Noida

- Graduated: 08/2022
- GPA: 8.27/10

12th Standard: Science, 12/2018

Central Academy - Alwar

- Completed: 12/2018
- GPA: 75.80%

CERTIFICATIONS

- Certificate Programme In Data Science & Machine Learning | Indian Institute of Technology, Delhi
- Data Structure and Algorithms | Udemy
- Server-Side Development with NodeJS | Coursera
- Neural Networks and Deep Learning | Coursera
- Programming for Everybody (Python) | Coursera

COMMUNITY SERVICE & VOLUNTEER WORK

UMEED NGO, Taught underprivileged children, helping them gain essential academic skills.

AWARDS & RECOGNITION

XTRA Miller Award for outstanding performance at Thales, Editorial Member at the 11th International Confluence 2021

INTERESTS

Reading, Canvas Painting, Playing Synth and Guitar
